

Abstract

A food and drink ordering system in an eating and drinking place for allowing a customer to make a precise order of a desired food and drink from the customer's table to a kitchen. The food and drink ordering system includes image display means and order input means for inputting information on the food and drink ordered, both of which are provided at the customer's table; order display means, set in the food and drink supplying place, for displaying the information on contents and place of the order; and a control unit having a menu display function of displaying information on available foods and drinks on the image display means at the customer's table and an information function of giving the information on the selected food and drink to the kitchen when the customer selects any item from the information on the available foods and drinks displayed on the image display means by use of the order input means.
